BORROWING POLICY

Original Council Approval		Amended
Date of Council Approval	30 May 2025	No
Resolution Number	Item 125/05/2025	
Effective Date	1 July 2025	

1. BACKGROUND

The Local Government: Municipal Finance Management Act 56 of 2003 (hereafter MFMA) section 18 requires that an annual budget may only be funded from:

- (a) Realistically anticipated revenues to be collected;
- (b) Cash backed accumulated funds from previous years' surpluses not committed for other purposes; and
- (c) Borrowed funds, but only for capital projects.

Section 19 of the MFMA also requires spending on a capital project may only commence once the funding sources have been considered, are available and have not been committed for other purposes. Furthermore, Chapter 6 of the MFMA 6 guides on the requirements of obtaining Short Term and Long - Term Debt, Conditions to comply with when applying for Debt, Security, Disclosures and Municipal Guarantees.

The Local Government: Municipal Finance Management Act 56 of 2003 Municipal Budget and Reporting Regulations, 2009 Section 8 requires that each Municipality should have a Borrowing Policy.

2. OBJECTIVES

The objectives of the policy are as follows:

- (a) To comply with the legislative requirements;
- (b) Manage interest rate and credit risk exposure;
- (c) Maintain debt within specified limits and ensure adequate provision for the repayment of debt;
- (d) To ensure compliance with all Legislation and Council policy governing borrowing of funds.

3. INTRODUCTION AND BACKGROUND

The Municipality may only incur debt in terms of the Municipal Finance Management Act, 56 of 2003.

- 3.1 A municipality may incur short-term and long-term debt only if:
 - 3.1.1 The debt is denominated in Rand and is not indexed to, or affected by, fluctuations in the value of the Rand against any foreign currency;
 - 3.1.2 A council resolution is taken authorising the provision of security if security is to be provided by the municipality; and
 - 3.1.3 The following ratios for Liability Management is favorable:

-
- Capital Cost (Interest Paid and Redemption) as a % of Total Operating Expenditure

Purpose/ Use of the Ratio

The Ratio indicates the cost required to service the borrowing. It assesses the borrowing or payment obligation expressed as a percentage of Total Operating Expenditure.

Formula

Capital Cost (Interest Paid and Redemption) / Total Operating Expenditure x 100

Norm

The norm is between 6% to 8%

Interpretation of Results

Operating below the Norm could indicate that the Municipality has the capacity to take on additional financing from borrowing to invest in infrastructure projects or it could relate to cash flow problems where it is unable to access borrowed funds or the funding decisions of the municipality impacts of these levels. On the other hand, exceeding the Norm could pose a risk to the Municipality should changes or fluctuations in financing costs arise. When assessing this ratio, the cash flow requirements of the Municipality should also be considered.

- Debt (Total Borrowings)/ Total Operating Revenue

Purpose/ Use of the Ratio

The Ratio indicates the extent of Total Borrowings in relation to Total Operating Revenue. It indicates short and long term debt financing relative to operating revenue of the municipality. The purpose of the Ratio is to provide assurance that sufficient Revenue will be generated to repay Liabilities. Alternatively stated, the Ratio indicates the affordability of the Total Borrowings.

Formula

Debt (Short Term Borrowing + Bank Overdraft + Short Term Lease + Long Term Borrowing + Long Term Lease) / Total Operating Revenue - Operating Conditional Grant

Norm

The norm is 45%

Interpretation of Results

If the result of the Ratio analysis indicates less than 45% then the Municipality still has capacity to increase funding from borrowings, however, this should be considered within

the cash flow requirements of the Municipality.

3.2 Short Term Debt

3.2.1 The Municipality may incur short-term debt only when necessary to bridge:

3.2.1.1 Shortfalls within a financial year during which the debt is incurred, in expectation of specific and realistically anticipated income to be received within that financial year; or
